## Community-Based Research: Teaching for Community Impact

Community-based research (CBR) refers to collaborative investigation by academics and non-academic community members that fosters positive change on a local level. Despite recent trends toward engaged scholarship, few publications demonstrate how to effectively integrate CBR into academic course work or take advantage of its potential for achieving community change.

*Community-Based Research: Teaching for Community Impact* fills these gaps by providing:

- \* An overview of language and methods used by professionals engaged in CBR
- \* A framework for orienting CBR toward concrete community outcomes
- \* Effective ways to integrate CBR into course content, student-driven projects, and initiatives spanning disciplines, curricula, campuses and countries
- \* Lessons learned in working toward positive outcomes for students and in communities

This text is designed for faculty, graduate students, service-learning and other engaged learning and scholarship practitioners, alliance members, special interest groups, and organizations that desire to strengthen student learning and utilize research for improvement in their communities.
