**Transport and Developing Countries** Dr David Hilling, David Hilling

Impassable roads, poorly maintained railways, bankrupt airlines, congested cities, and inefficient ports - are there links between these issues and lack of economic progress in developing countries? Inland waterways, ports, railways, roads, air and urban transport are all discussed and illustrated with examples of good and bad practice. The author explains how transport can only be effective if timing, location and technology are chosen carefully and if decisions are in the hands of the right parties.
