Geotrekking in Southeastern Arabia: A Guide to Locations of World-Class Geology (Special Publications) Benjamin R. Jordan

Published by the American Geophysical Union as part of the *Special Publications Series*.

Geotrekking in Southeastern Arabia presents the world's most diverse geology and reveals some of the unique rocks that were once covered under shallow seas and are now sub-aerially exposed. This guidebook describes various routes that leads to specific locations for viewing the distinctive and world class geology of the United Arab Emirates and Oman. Each route includes specific directions, satellite images, illustrations, and explanations that can help with locating the outstanding geology of the area. Certain sites preserve the world class ophiolites - a section of the Earth's oceanic crust and the underlying upper mantle that has been uplifted and exposed above sea level and often emplaced onto continental crustal rocks, a unique process of the Earth described by plate tectonics.

Some salient features of this guidebook include:

- UAE and Oman are situated in the south east coast of the Arabian Peninsula, which is very well known for its vast reserves of oil and natural gas, hence this book is of great interest to exploration geologists
- Mountains of the UAE and Oman are the world's largest and best preserved ophiolite – a slice of the deep ocean crust that has been forced by tectonic forces onto a continental crust
- Within the mountains of these regions are sections of the deep Earth, rarely exposed anywhere – pieces of the Earth's underlying mantle and the lower parts of its oceanic crust
- Other characteristic features include deep sea sediments and volcanic rocks that were erupted by submarine volcanoes
- Among mineral ores, copper deposits were commonly formed at ancient, deep sea, hydrothermal vents
- Some of the groundwater flowing out of ophiolite rocks reacts with the atmosphere to precipitate calcite and form vast pools of water that appear as blue swimming pools
- The shallow land and high evaporation conditions in the western region of the UAE forms giant, salt-lined mudcracks and the growth of gypsum clusters called “desert roses”
- Stromatolites, colonies of cyanobacteria that are probably some of the oldest living species on Earth are also very common in this region
- Some dunes in UAE rise upto 160 m above evaporative salt plains
- Rare occurrence of 100 million-year-old pillow lavas, which form underwater, uniquely preserved as if they erupted yesterday
- Many other geologic marvels exist in a region known more for its oil and gas geology

From reader reviews:

Shellie Toy:

In other case, little folks like to read book Geotrekking in Southeastern Arabia: A Guide to Locations of World-Class Geology (Special Publications). You can choose the best book if you'd prefer reading a book. As long as we know about how is important a book Geotrekking in Southeastern Arabia: A Guide to Locations of World-Class Geology (Special Publications). You can add information and of course you can around the world by just a book. Absolutely right, simply because from book you can realize everything! From your country right up until foreign or abroad you will end up known. About simple thing until wonderful thing you could know that. In this era, you can open a book or searching by internet device. It is called e-book. You may use it when you feel bored to go to the library. Let's read.

Nora Cordova:

In this 21st millennium, people become competitive in every way. By being competitive right now, people have do something to make them survives, being in the middle of the actual crowded place and notice through surrounding. One thing that occasionally many people have underestimated it for a while is reading. That's why, by reading a e-book your ability to survive raise then having chance to endure than other is high. To suit your needs who want to start reading the book, we give you this Geotrekking in Southeastern Arabia: A Guide to Locations of World-Class Geology (Special Publications) book as starter and daily reading guide. Why, because this book is greater than just a book.

Bessie Hall:

Information is provisions for individuals to get better life, information these days can get by anyone in everywhere. The information can be a information or any news even an issue. What people must be consider when those information which is inside the former life are difficult to be find than now is taking seriously which one is appropriate to believe or which one the resource are convinced. If you obtain the unstable resource then you understand it as your main information it will have huge disadvantage for you. All those possibilities will not happen within you if you take Geotrekking in Southeastern Arabia: A Guide to Locations of World-Class Geology (Special Publications) as your daily resource information.

Kelly Breedlove:

You will get this Geotrekking in Southeastern Arabia: A Guide to Locations of World-Class Geology (Special Publications) by browse the bookstore or Mall. Just viewing or reviewing it may to be your solve issue if you get difficulties for the knowledge. Kinds of this publication are various. Not only by simply written or printed but also can you enjoy this book by e-book. In the modern era similar to now, you just looking because of your mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your reserve. It is most important to arrange yourself to make your knowledge are still up-date. Let's try to choose appropriate ways for you.
