Drought: Research and Science-Policy Interfacing

Drought: Research and Science-Policy Interfacing

Droughts occur in arid and semi-arid areas of the world, but also in humid areas, and can develop over short periods (flash drought) or longer periods (seasons/decades). Even though progress has been made, it remains difficult to adequately characterize, monitor, forecast and manage droughts, due to their multi-faceted nature.

Usually, drought does not directly cause fatalities, but a wide range of socio-economic and environmental effects may occur, and, depending on the region, water-and food-related diseases and casualties can be triggered. Europe has regularly been hit hard by drought (e.g. recently Russia), and large portions of USA, Mexico, Brazil, China, India, Central Asia, South Africa, the Great Horn of Africa, or Australia, have been affected by drought. So globally, drought affects more regions, and more people, than other natural hazards.

Additionally, climate change projections for many areas indicate that droughts are likely to become more frequent and more severe due to the increased variability of precipitation and temperature, tied in some cases to decreased average precipitation and increased average temperature. Hence, there is an urgent need to improve drought preparedness through measures that reduce vulnerability to drought and the risks they pose, in particular considering the uncertain future.

Drought. Research and Science Policy Interfacing includes contributions to the International Conference on DROUGHT: Research and Science-Policy Interfacing (Valencia, Spain, 10-13 March 2015), the final event of the EU FP7 research project DROUGHT-R&SPI (Fostering European Drought Research and Science-Policy Interfacing). The book aims to foster development of drought policies and plans to reduce risk and vulnerability, and to enhance preparedness and resilience.

The book addresses the following topics : (1) past, present and future of droughts (natural hazards, identification and characterization, impacts); (2) indicators, monitoring and forecasting (including early warning systems), risk and vulnerability assessment and reduction at different scales, and (3) preparedness and mitigation options (risk and vulnerability perception, water management and governance under drought

conditions, design and implementation of drought policies and plans from the local to the regional, national and international levels, research Interfaces with drought policies).

Drought. Research and Science Policy Interfacing will be of interest to researchers and professionals in those fields related to drought, such as climatology, meteorology, hydrology, agronomy, ecology, water economy, and water management, as well as to policy makers involved in drought preparedness and mitigation strategies at local, regional, national and international levels.

From reader reviews:

Frances Williamson:

What do you consider book? It is just for students as they are still students or it for all people in the world, the actual best subject for that? Just you can be answered for that question above. Every person has several personality and hobby for each other. Don't to be compelled someone or something that they don't desire do that. You must know how great and also important the book Drought: Research and Science-Policy Interfacing. All type of book would you see on many resources. You can look for the internet options or other social media.

Pete Dominguez:

Playing with family within a park, coming to see the water world or hanging out with close friends is thing that usually you might have done when you have spare time, then why you don't try issue that really opposite from that. One particular activity that make you not feeling tired but still relaxing, trilling like on roller coaster you are ride on and with addition of knowledge. Even you love Drought: Research and Science-Policy Interfacing, you may enjoy both. It is excellent combination right, you still desire to miss it? What kind of hang-out type is it? Oh can happen its mind hangout men. What? Still don't get it, oh come on its known as reading friends.

Tia Sargent:

Would you one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Try to pick one book that you never know the inside because don't assess book by its cover may doesn't work this is difficult job because you are afraid that the inside maybe not as fantastic as in the outside search likes. Maybe you answer is usually Drought: Research and Science-Policy Interfacing why because the wonderful cover that make you consider in regards to the content will not disappoint you actually. The inside or content is actually fantastic as the outside or cover. Your reading 6th sense will directly direct you to pick up this book.

Cristen Washington:

That publication can make you to feel relax. This book Drought: Research and Science-Policy Interfacing was vibrant and of course has pictures on the website. As we know that book Drought: Research and Science-Policy Interfacing has many kinds or category. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and believe that you are the character on there. So , not at all of book tend to be make you bored, any it makes you feel happy, fun and rest. Try to choose the best book in your case and try to like reading this.
