Lung Cancer, An Issue of Clinics in Chest Medicine (The Clinics: Internal Medicine) Lynn T. Tanoue, Richard A. Matthay

Carcinoma of the lung is one of the most prevalent and aggressive types of cancer, and rates of lung cancer are on the rise. This issue gives a comprehensive review of the most recent advances in Lung Cancer. Epidemiology, etiology, and prevention of lung cancer is first discussed, followed by articles on pre-invasive evaluation and management, screening, pathology and molecular biology. There is an article on the approach to the ground glass nodule. Of great importance is the revised staging classification of Lung Cancer, which is discussed here in detail. Articles on PET imaging, interventional pulmonary, and functional evaluation before Lung Resection are also included. The issue then focuses on advances in treatment for early stage lung cancer, high risk patients with early stage lung cancer, advances in the treatment of Advanced Stage Lung Cancer, Small Cell Lung Cancer, and gene therapy for lung neoplasms.
