**Windows Server 2012 Security from End to Edge and Beyond: Architecting, Designing, Planning, and Deploying Windows Server 2012 Security Solutions** Thomas W Shinder, Yuri Diogenes, Debra Littlejohn Shinder

*Windows Server 2012 Security from End to Edge and Beyond* shows you how to architect, design, plan, and deploy Microsoft security technologies for Windows 8/Server 2012 in the enterprise. The book covers security technologies that apply to both client and server and enables you to identify and deploy Windows 8 security features in your systems based on different business and deployment scenarios. The book is a single source for learning how to secure Windows 8 in many systems, including core, endpoint, and anywhere access.

Authors Tom Shinder and Yuri Diogenes, both Microsoft employees, bring you insider knowledge of the Windows 8 platform, discussing how to deploy Windows security technologies effectively in both the traditional datacenter and in new cloud-based solutions. With this book, you will understand the conceptual underpinnings of Windows 8 security and how to deploy these features in a test lab and in pilot and production environments.

The book's revolutionary "Test Lab Guide" approach lets you test every subject in a predefined test lab environment. This, combined with conceptual and deployment guidance, enables you to understand the technologies and move from lab to production faster than ever before. Critical material is also presented in key concepts and scenario-based approaches to evaluation, planning, deployment, and management. Videos illustrating the functionality in the Test Lab can be downloaded from the authors' blog [http://blogs.technet.com/b/security\\_talk/](http://blogs.technet.com/b/security_talk/). Each chapter wraps up with a bullet list summary of key concepts discussed in the chapter.

- Provides practical examples of how to design and deploy a world-class security infrastructure to protect both Windows 8 and non-Microsoft assets on your system
- Written by two Microsoft employees who provide an inside look at the security features of Windows 8
- Test Lab Guides enable you to test everything before deploying live to your system
