For mathematics majors it is one of the core required courses. This new edition will bring the outline into synch with Rosen, McGraw-Hill's bestselling textbook in the field as well as up to speed in the current curriculum.

New material will include expanded coverage of logic, the rules of inference and basic types of proofs in mathematical reasoning. This will give students a better understanding of proofs of facts about sets and functions. There will be increased emphasis on discrete probability and aspects of probability theory, and greater accessibility to counting techniques.
