Vector Bundles in Algebraic Geometry (London Mathematical Society Lecture Note Series)

Vector Bundles in Algebraic Geometry (London Mathematical Society Lecture Note Series)

Vector Bundles in Algebraic Geometry (London Mathematical Society Lecture Note Series)
The study of vector bundles over algebraic varieties has been stimulated over the last few years by successive waves of migrant concepts, largely from mathematical physics, whilst retaining its roots in old questions concerning subvarieties of projective space. The 1993 Durham Symposium on Vector Bundles in Algebraic Geometry brought together some of the leading researchers in the field to explore further these interactions. This book is a collection of survey articles by the main speakers at the symposium and presents to the mathematical world an overview of the key areas of research involving vector bundles. Topics covered include those linking gauge theory and geometric invariant theory such as augmented bundles and coherent systems; Donaldson invariants of algebraic surfaces; Floer homology and quantum cohomology; conformal field theory and the moduli spaces of bundles on curves; the Horrocks–Mumford bundle and codimension 2 subvarieties in P4 and P5; exceptional bundles and stable sheaves on projective space.

From reader reviews:

Gussie Steller:

What do you concentrate on book? It is just for students since they are still students or the item for all people in the world, what the best subject for that? Just simply you can be answered for that problem above. Every person has several personality and hobby per other. Don't to be obligated someone or something that they don't would like do that. You must know how great and also important the book Vector Bundles in Algebraic Geometry (London Mathematical Society Lecture Note Series). All type of book are you able to see on many sources. You can look for the internet sources or other social media.

Alice Ybarra:

Nowadays reading books be than want or need but also work as a life style. This reading addiction give you lot of advantages. The advantages you got of course the knowledge your information inside the book in which improve your knowledge and information. The information you get based on what kind of reserve you read, if you want get more knowledge just go with education books but if you want experience happy read one using theme for entertaining like comic or novel. The Vector Bundles in Algebraic Geometry (London Mathematical Society Lecture Note Series) is kind of guide which is giving the reader erratic experience.

Gwendolyn Smith:

The reserve untitled Vector Bundles in Algebraic Geometry (London Mathematical Society Lecture Note Series) is the publication that recommended to you to learn. You can see the quality of the reserve content that will be shown to an individual. The language that author use to explained their ideas are easily to understand. The article author was did a lot of analysis when write the book, to ensure the information that they share for you is absolutely accurate. You also could get the e-book of Vector Bundles in Algebraic Geometry (London Mathematical Society Lecture Note Series) from the publisher to make you more enjoy free time.

Lindsay Washington:

As a student exactly feel bored in order to reading. If their teacher requested them to go to the library or make summary for some publication, they are complained. Just little students that has reading's soul or real their interest. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that reading is not important, boring in addition to can't see colorful pictures on there. Yeah, it is being complicated. Book is very important for you. As we know that on this era, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So , this Vector Bundles in Algebraic Geometry (London Mathematical Society Lecture Note Series) can make you feel more interested to read.
