Decision Analysis, Location Models, and Scheduling Problems

H. A. Eiselt, Carl-Louis Sandblom

Decision Analysis, Location Models, and Scheduling Problems H. A. Eiselt, Carl-Louis Sandblom

The purpose of this book is to provide readers with an introduction to the fields of decision making, location analysis, and project and machine scheduling. The combination of these topics is not an accident: decision analysis can be used to investigate decision scenarios in general, location analysis is one of the prime examples of decision making on the strategic level, project scheduling is typically concerned with decision making on the tactical level, and machine scheduling deals with decision making on the operational level. Some of the chapters were originally contributed by different authors, and we have made every attempt to unify the notation, style, and, most importantly, the level of the exposition. Similar to our book on Integer Programming and Network Models (Eiselt and Sandblom, 2000), the emphasis of this volume is on models rather than solution methods. This is particularly important in a book that purports to promote the science of decision making. As such, advanced undergraduate and graduate students, as well as practitioners, will find this volume beneficial. While different authors prefer different degrees of mathematical sophistication, we have made every possible attempt to unify the approaches, provide clear explanations, and make this volume accessible to as many readers as possible.

From reader reviews:

Sarah Davis:

This Decision Analysis, Location Models, and Scheduling Problems book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is information inside this e-book incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This particular Decision Analysis, Location Models, and Scheduling Problems without we understand teach the one who looking at it become critical in pondering and analyzing. Don't be worry Decision Analysis, Location Models, and Scheduling Problems can bring once you are and not make your carrier space or bookshelves' turn out to be full because you can have it inside your lovely laptop even phone. This Decision Analysis, Location Models, and Scheduling Problems having very good arrangement in word and also layout, so you will not feel uninterested in reading.

Jane Rich:

The ability that you get from Decision Analysis, Location Models, and Scheduling Problems is the more deep you rooting the information that hide into the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to know but Decision Analysis, Location Models, and Scheduling Problems giving you joy feeling of reading. The writer conveys their point in specific way that can be understood through anyone who read it because the author of this reserve is well-known enough. That book also makes your vocabulary increase well. That makes it easy to understand then can go to you, both in printed or e-book style are available. We highly recommend you for having this specific Decision Analysis, Location Models, and Scheduling Problems instantly.

Jacqueline Ramos:

Reading a publication can be one of a lot of task that everyone in the world enjoys. Do you like reading book so. There are a lot of reasons why people enjoy it. First reading a reserve will give you a lot of new facts. When you read a book you will get new information simply because book is one of several ways to share the information or their idea. Second, examining a book will make an individual more imaginative. When you examining a book especially fictional book the author will bring one to imagine the story how the characters do it anything. Third, you could share your knowledge to other people. When you read this Decision Analysis, Location Models, and Scheduling Problems, you can tells your family, friends as well as soon about yours e-book. Your knowledge can inspire the mediocre, make them reading a publication.

Gary Carter:

The reserve with title Decision Analysis, Location Models, and Scheduling Problems possesses a lot of information that you can find out it. You can get a lot of benefit after read this book. This kind of book exist new expertise the information that exist in this publication represented the condition of the world right now. That is important to yo7u to learn how the improvement of the world. This particular book will bring you

with new era of the globalization. You can read the e-book on your own smart phone, so you can read it anywhere you want.
