The Statistical Theory of Non-Equilibrium Processes in a Plasma: International Series of Monographs in Natural Philosophy, Vol. 9 Yu L Klimontovich

The Statistical Theory of Non-equilibrium Processes in a Plasma covers the modern statistical theory of non-equilibrium processes in a plasma by a unified method, proceeding from the microscopic equations. The book discusses Maxwell equations for slow and fast processes; magnetohydrodynamic equations; microscopic equations for a plasma; and equations with a self-consistent field (Vlasov equations). The text then describes correlation and spectral function; kinetic equations for a plasma; and Landau equations. It also examines the kinetic equations and expressions for spectral functions when the radiation by plasma waves is taken into account; and the hydrodynamic description of processes in a plasma. Physicists and students taking courses in mechanics and mathematics will find the book invaluable.

From reader reviews:

Sabra Fitzgerald:

This The Statistical Theory of Non-Equilibrium Processes in a Plasma: International Series of Monographs in Natural Philosophy, Vol. 9 book is absolutely not ordinary book, you have it then the world is in your hands. The benefit you receive by reading this book is definitely information inside this publication incredible fresh, you will get details which is getting deeper you read a lot of information you will get. This kind of The Statistical Theory of Non-Equilibrium Processes in a Plasma: International Series of Monographs in Natural Philosophy, Vol. 9 without we comprehend teach the one who reading it become critical in imagining and analyzing. Don't become worry The Statistical Theory of Non-Equilibrium Processes in a Plasma: International Series of Monographs in Natural Philosophy, Vol. 9 can bring any time you are and not make your case space or bookshelves' turn out to be full because you can have it inside your lovely laptop even phone. This The Statistical Theory of Non-Equilibrium Processes in a Plasma: International Series of Monographs in Natural Philosophy, Vol. 9 having excellent arrangement in word and also layout, so you will not sense uninterested in reading.

Mamie Perkins:

Now a day people who Living in the era just where everything reachable by match the internet and the resources inside can be true or not demand people to be aware of each information they get. How a lot more to be smart in having any information nowadays? Of course the answer is reading a book. Examining a book can help folks out of this uncertainty Information specially this The Statistical Theory of Non-Equilibrium Processes in a Plasma: International Series of Monographs in Natural Philosophy, Vol. 9 book because book offers you rich info and knowledge. Of course the info in this book hundred percent guarantees there is no doubt in it everybody knows.

Timothy Pace:

Hey guys, do you would like to finds a new book you just read? May be the book with the title The Statistical Theory of Non-Equilibrium Processes in a Plasma: International Series of Monographs in Natural Philosophy, Vol. 9 suitable to you? Typically the book was written by renowned writer in this era. The actual book untitled The Statistical Theory of Non-Equilibrium Processes in a Plasma: International Series of Monographs in Natural Philosophy, Vol. 9 is the one of several books that will everyone read now. This particular book was inspired a number of people in the world. When you read this publication you will enter the new age that you ever know ahead of. The author explained their idea in the simple way, therefore all of people can easily to recognise the core of this publication. This book will give you a great deal of information about this world now. In order to see the represented of the world within this book.

Tania Hansen:

A lot of people said that they feel weary when they reading a reserve. They are directly felt it when they get a

half parts of the book. You can choose the actual book The Statistical Theory of Non-Equilibrium Processes in a Plasma: International Series of Monographs in Natural Philosophy, Vol. 9 to make your own reading is interesting. Your own skill of reading talent is developing when you such as reading. Try to choose easy book to make you enjoy to see it and mingle the sensation about book and examining especially. It is to be initial opinion for you to like to available a book and examine it. Beside that the book The Statistical Theory of Non-Equilibrium Processes in a Plasma: International Series of Monographs in Natural Philosophy, Vol. 9 can to be your friend when you're feel alone and confuse with the information must you're doing of that time.
