Solid State Physics (Manchester Physics Series)

J. R. Hook, H. E. Hall

Solid State Physics (Manchester Physics Series) J. R. Hook, H. E. Hall

This Second Edition is aimed at students taking a first course in this subject, although it will also be of interest to professional physicists and electronic engineers requiring a grasp of the fundamentals of this important area of physics. Basic concepts are introduced in an easily accessible context: for example, wave propagation in crystals is introduced using one- and two-dimensional geometries. Only when these basic ideas are familiar are generalisations to three dimensions and the elegant framework of the reciprocal lattice made. Extensively rewritten, the Second Edition now includes new and expanded coverage of semiconductor devices, the quantum Hall effect, quasicrystals, high temperature superconductors and techniques for the study of the surfaces of solids. A chapter on dielectrics and ferroelectrics has also been added. Solid State Physics, Second Edition features:

- A carefully written and structured text to help students fully understand this exciting subject.
- A flow diagram allowing topics to be studied in different orders or omitted altogether.
- Optional "starred" and highlighted sections containing more advanced and specialised material for the more ambitious reader.
- Carefully selected problems at the end of each chapter designed to assist learning. Solutions are provided at the end of the book.

From reader reviews:

Clarence Ross:

Book is definitely written, printed, or illustrated for everything. You can learn everything you want by a publication. Book has a different type. As it is known to us that book is important factor to bring us around the world. Adjacent to that you can your reading talent was fluently. A book Solid State Physics (Manchester Physics Series) will make you to possibly be smarter. You can feel a lot more confidence if you can know about every thing. But some of you think which open or reading some sort of book make you bored. It's not make you fun. Why they might be thought like that? Have you searching for best book or suited book with you?

Mary Blackwell:

Playing with family in the park, coming to see the sea world or hanging out with pals is thing that usually you may have done when you have spare time, and then why you don't try thing that really opposite from that. Just one activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition associated with. Even you love Solid State Physics (Manchester Physics Series), you are able to enjoy both. It is fine combination right, you still wish to miss it? What kind of hangout type is it? Oh come on its mind hangout guys. What? Still don't have it, oh come on its named reading friends.

Raymond Lee:

In this period of time globalization it is important to someone to obtain information. The information will make anyone to understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You will see that now, a lot of publisher that print many kinds of book. Often the book that recommended to you personally is Solid State Physics (Manchester Physics Series) this reserve consist a lot of the information of the condition of this world now. This kind of book was represented how can the world has grown up. The language styles that writer require to explain it is easy to understand. The writer made some analysis when he makes this book. That is why this book appropriate all of you.

Malcolm Thurmond:

That reserve can make you to feel relax. This particular book Solid State Physics (Manchester Physics Series) was multi-colored and of course has pictures on the website. As we know that book Solid State Physics (Manchester Physics Series) has many kinds or genre. Start from kids until teenagers. For example Naruto or Private investigator Conan you can read and think that you are the character on there. Therefore , not at all of book are generally make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading that.
