Evaluating Options for U.S. Greenhouse-Gas Mitigation Using Multiple Criteria Nicholas Burger, Liisa Ecola, Thomas Light, Michael Toman

Choosing policy responses to mitigate greenhouse gases (GHGs) is one of the great challenges that the United States faces. It will require balancing cost-effectiveness and other objectives that reflect the institutional and political realities of passing major federal legislation with widespread impacts on U.S. producers and consumers. This paper develops a framework for evaluating U.S. GHG-mitigation policy that balances several criteria.
