Product and Process Modelling: A Case Study Approach

Ian T. Cameron, Rafiqul Gani

Product and Process Modelling: A Case Study Approach Ian T. Cameron, Rafiqul Gani

This book covers the area of product and process modelling via a case study approach. It addresses a wide range of modelling applications with emphasis on modelling methodology and the subsequent in-depth analysis of mathematical models to gain insight via structural aspects of the models. These approaches are put into the context of life cycle modelling, where multiscale and multiform modelling is increasingly prevalent in the 21st century. The book commences with a discussion of modern product and process modelling theory and practice followed by a series of case studies drawn from a variety of process industries. The book builds on the extensive modelling experience of the authors, who have developed models for both research and industrial purposes. It complements existing books by the authors in the modelling area. Those areas include the traditional petroleum and petrochemical industries to biotechnology applications, food, polymer and human health application areas. The book highlights the important nature of modern product and process modelling in the decision making processes across the life cycle. As such it provides an important resource for students, researchers and industrial practitioners.

Ian Cameron is Professor in Chemical Engineering at the University of Queensland with teaching, research, and consulting activities in process systems engineering. He has a particular interest in process modelling, dynamic simulation, and the application of functional systems perspectives to risk management, having extensive industrial experience in these areas. He continues to work closely with industry and government on systems approaches to process and risk management issues. He received his BE from the University of New South Wales (Australia) and his PhD from Imperial College London. He is a Fellow of IChemE.

Rafiqul Gani is a Professor of Systems Design at the Department of Chemical and Biochemical Engineering, Technical University of Denmark, and the director of the Computer Aided Product-Process Engineering Center (CAPEC). His research interests include the development of computer-aided methods and tools for modelling, property estimation and process-product synthesis and design. He received his BSc from Bangladesh University of Engineering and Technology in 1975, and his MSc in 1976 and PhD in 1980 from Imperial College London. He is the editor-in-chief of Computers and Chemical Engineering journal and Fellow of IChemE as well as AIChE.

- product and process modelling; a wide range of case studies are covered
- structural analysis of model systems; insights into structure and solvability
- analysis of future developments; potential directions and significant research and development problems to be addressed

From reader reviews:

Kelly Watson:

This Product and Process Modelling: A Case Study Approach tend to be reliable for you who want to be described as a successful person, why. The key reason why of this Product and Process Modelling: A Case Study Approach can be one of the great books you must have will be giving you more than just simple examining food but feed an individual with information that maybe will shock your preceding knowledge. This book is actually handy, you can bring it all over the place and whenever your conditions in e-book and printed types. Beside that this Product and Process Modelling: A Case Study Approach giving you an enormous of experience for example rich vocabulary, giving you trial of critical thinking that we realize it useful in your day exercise. So , let's have it and enjoy reading.

Kevin Kennard:

Why? Because this Product and Process Modelling: A Case Study Approach is an unordinary book that the inside of the book waiting for you to snap it but latter it will zap you with the secret the idea inside. Reading this book close to it was fantastic author who have write the book in such awesome way makes the content inside easier to understand, entertaining technique but still convey the meaning completely. So , it is good for you for not hesitating having this any longer or you going to regret it. This unique book will give you a lot of advantages than the other book possess such as help improving your expertise and your critical thinking means. So , still want to hesitate having that book? If I have been you I will go to the publication store hurriedly.

Shirley Wales:

Reading a book for being new life style in this calendar year; every people loves to examine a book. When you examine a book you can get a large amount of benefit. When you read guides, you can improve your knowledge, since book has a lot of information in it. The information that you will get depend on what kinds of book that you have read. In order to get information about your analysis, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this sort of us novel, comics, and soon. The Product and Process Modelling: A Case Study Approach offer you a new experience in looking at a book.

Kyle Reese:

As we know that book is significant thing to add our understanding for everything. By a e-book we can know everything we really wish for. A book is a list of written, printed, illustrated or perhaps blank sheet. Every year ended up being exactly added. This reserve Product and Process Modelling: A Case Study Approach was filled with regards to science. Spend your extra time to add your knowledge about your scientific research competence. Some people has several feel when they reading some sort of book. If you know how big benefit from a book, you can feel enjoy to read a book. In the modern era like currently, many ways to

get book you wanted.
