## The Austrian Contribution to Analytic Philosophy (London Studies in the History of Philosophy)

Although an important part of the origins of analytic philosophy can be traced back to philosophy in Austria in the first part of the twentieth century, remarkably little is known about the specific contribution made by Austrian philosophy and philosophers.

In *The Austrian Contribution to Analytic Philosophy*, prominent analytic philosophers take a fresh look at the roots of analytic philosophy in the thought of influential but often overlooked Austrian philosophers including Brentano, Meinong, Bolzano, Husserl, and Wittgenstein. The contributors to this volume investigate central topics in theoretical philosophy such as intentionality, consciousness, memory, attributes, and truth as well as political philosophy and aesthetics.

This original collection will be of interest to anyone studying the origins of analytic philosophy as well as contemporary debates in philosophy of language, metaphysics and mind.
