Comprehensive Handbook of Childhood Cancer and Sickle Cell Disease: A Biopsychosocial Approach

Comprehensive Handbook of Childhood Cancer and Sickle Cell Disease: A Biopsychosocial Approach

Over recent decades, tremendous advances in the prevention, medical treatment, and quality of life issues in children and adolescents surviving cancer have spawned a host of research on pediatric psychosocial oncology. This important volume fulfills the clear need for an up-to-date, comprehensive handbook for practitioners that delineates the most recent research in the field--the first of its kind in over a decade. Over 60 renowned authors have been assembled to provide a thorough presentation of the state-of-the art research and literature, with topics including:

- Neuropsychological effects of chemotherapy and radiation therapy
- Bone marrow transplantation
- Important issues about quality of life during and following treatment
- Collaborative research among child-focused psychologists
- Standards of psychological care for children and adolescents
- Stress and coping in the pediatric cancer experience
- The role of family and peer relationships

The Comprehensive Handbook of Childhood Cancer and Sickle Cell Disease represents both multidisciplinary and international efforts, an alliance between physicians and parents, and a combination of research and service. With a wealth of information of great interest to patients and their families, this volume will also be a welcome resource to the psychologists, psychiatrists, pediatricians, oncologists, nurses, and social workers who confront these issues as they help children and their families through the treatment, recovery, and grieving processes.
