**Multicriteria Evaluation in Physical Planning (Contributions to Economic Analysis)** P. Nijkamp, P. Rietveld, H. Voogd

The aim of this book on the use of multiple criteria analysis in physical planning is to synthesize most of the relevant work in this field. Its first objective is to provide a concise and systematic overview of the state of the art in the area of multiple criteria analysis, with a strong emphasis on practical use and planning. Secondly, this book attempts to show the wealth of potential applications of multiple criteria analysis by providing a presentation and discussion of various real-world uses of multiple criteria decision-making in the practice of physical planning.

The book is mainly intended as a textbook for practitioners in the field and for students in the areas of (physical) planning, regional and urban economics, geography, transportation science and environmental management.
