Constructing Knowledge for Teaching Secondary Mathematics: Tasks to enhance prospective and practicing teacher learning: 6 (Mathematics Teacher Education)

Constructing Knowledge for Teaching Secondary Mathematics: Tasks to enhance prospective and practicing teacher learning: 6 (Mathematics Teacher Education)

Teacher education seeks to transform prospective and/or practicing teachers from neophyte possibly uncritical perspectives on teaching and learning to more knowledgeable, adaptable, analytic, insightful, observant, resourceful, reflective and confident professionals ready to address whatever challenges teaching secondary mathematics presents.

This transformation occurs optimally through constructive engagement in tasks that foster knowledge for teaching secondary mathematics. Ideally such tasks provide a bridge between theory and practice, and challenge, surprise, disturb, confront, extend, or provoke examination of alternatives, drawn from the context of teaching. We define tasks as the problems or activities that, having been developed, evaluated and refined over time, are posed to teacher education participants. Such participants are expected to engage in these tasks collaboratively, energetically, and intellectually with an open mind and an orientation to future practice. The tasks might be similar to those used by classroom teachers (e.g., the analysis of a graphing problem) or idiosyncratic to teacher education (e.g., critique of videotaped practice).

This edited volume includes chapters based around unifying themes of tasks used in secondary mathematics teacher education. These themes reflect goals for mathematics teacher education, and are closely related to various aspects of knowledge required for teaching secondary mathematics. They are not based on the conventional content topics of teacher education (e.g., decimals, grouping practices), but on broad goals such as adaptability, identifying similarities, productive disposition, overcoming barriers, micro simulations, choosing tools, and study of practice. This approach is innovative and appeals both to prominent authors and to our target audiences.

From reader reviews:

Robert Frye:

Now a day those who Living in the era everywhere everything reachable by interact with the internet and the resources inside it can be true or not need people to be aware of each details they get. How a lot more to be smart in obtaining any information nowadays? Of course the reply is reading a book. Reading through a book can help folks out of this uncertainty Information specially this Constructing Knowledge for Teaching Secondary Mathematics: Tasks to enhance prospective and practicing teacher learning: 6 (Mathematics Teacher Education) book because this book offers you rich information and knowledge. Of course the information in this book hundred per-cent guarantees there is no doubt in it everbody knows.

David Cain:

You could spend your free time to read this book this guide. This Constructing Knowledge for Teaching Secondary Mathematics: Tasks to enhance prospective and practicing teacher learning: 6 (Mathematics Teacher Education) is simple to bring you can read it in the area, in the beach, train along with soon. If you did not include much space to bring the actual printed book, you can buy the actual e-book. It is make you quicker to read it. You can save the actual book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.

Timothy Grill:

Many people spending their moment by playing outside together with friends, fun activity having family or just watching TV the entire day. You can have new activity to shell out your whole day by looking at a book. Ugh, you think reading a book can definitely hard because you have to bring the book everywhere? It okay you can have the e-book, having everywhere you want in your Smart phone. Like Constructing Knowledge for Teaching Secondary Mathematics: Tasks to enhance prospective and practicing teacher learning: 6 (Mathematics Teacher Education) which is obtaining the e-book version. So , try out this book? Let's see.

Sean Ward:

Don't be worry in case you are afraid that this book will certainly filled the space in your house, you might have it in e-book way, more simple and reachable. That Constructing Knowledge for Teaching Secondary Mathematics: Tasks to enhance prospective and practicing teacher learning: 6 (Mathematics Teacher Education) can give you a lot of pals because by you taking a look at this one book you have matter that they don't and make an individual more like an interesting person. This particular book can be one of a step for you to get success. This guide offer you information that possibly your friend doesn't realize, by knowing more than different make you to be great persons. So , why hesitate? Let's have Constructing Knowledge for Teaching Secondary Mathematics: Tasks to enhance prospective and practicing teacher learning: 6 (Mathematics Teacher Education).
