## Fifty Years of Comparative Education

This edited collection was produced to celebrate the 50<sup>th</sup> anniversary of the journal *Comparative Education*, one of the most established and prestigious journals in the field. Each chapter was written by a leading scholar of comparative and international education. The collection marks a creative and critical engagement with some of the most important topics in contemporary comparative education, including 'big data', pedagogy, adult education, scholarly mobility, and gender. The theme of 'silences' connects the papers: while comparative education covers the breadth and depth of educational concerns, it has its own obsessions, but which themes do not receive the attention they deserve?

This book will be of interest to anyone interested in the theory, method and practice of comparative education today or in its development over the past 50 years. It will be informative to all scholars and graduate students concerned with education in its global contexts. In addition, to those readers who situate themselves within the field of comparative and international education, it offers a unique perspective on this important area of inquiry and the activities, preoccupations, absences and communities within it.

This book was originally published as a special issue of *Comparative Education*.
