The future of energy consumption, prices, and intensity remains uncertain, but this analysis suggests that greater energy efficiency has had, and may continue to have, a positive effect on the Massachusetts economy. Together, targeted energyefficiency programs in commercial, industrial, and residential sectors have the potential to continue to provide benefits to Massachusetts, and they remain a costeffective option for meeting the state's increasing energy demand. The authors show that savings from commercial and industrial energyefficiency programs have provided a positive return on utility investment, and they demonstrate benefits of energy efficiency for Massachusetts households, particularly for low income households.
